

# BYOD Classroom Guidelines

## **Responsible Use of your Device in the Classroom**

1. Teachers determine how and when devices will be used in class, if allowed. If not allowed, devices must be **off** in class.
2. Devices used in the classroom are for **school work only**. Other usage of the device is not allowed unless specifically allowed by your teacher.
3. Personal devices used for school work are subject to the school division's Acceptable Use Policy. Inappropriate use of your device may result in seizure or the banning of your device for use in class.
4. Students are expected to use the school's WiFi connection while in class, which has appropriate content filtering. Personal Data Plans should not be used.
5. Absolutely **NO** audio, video recording and/or photo taking unless teacher permission for school related project has been granted.
6. Personal devices should be fully charged prior to the school day. Students need to ensure that their device contains the latest OS and App updates.
7. All technical or hardware issues are the student's responsibility. Every device is configured for your preferences - you are responsible for its suitability for use in class.
8. You are responsible for the security of your own device. The school division is not responsible for damage or loss as the result of student use of their devices.

**Possessing and using personal electronic devices in class is a *privilege* and NOT a right.**

**Please respect all rules and policies.**
